BIOGRAFIA

MAURO FADEL

Swiss by birth, 1963 in St. Gallen (CH), Switzerland, he now lives and works in Oderzo (TV), Italy. In 1992, he graduated in architecture, specializing in a Master's degree in Industrial Design at the IED (Istituto Europeo di Design) in Milan.

In 1996, he opened his own studio, specializing in architecture, industrial design, graphics, and furniture. His projects combine meticulous research into new materials and the most innovative solutions, combining exclusive design and ergonomics with creative originality. Designing and creating innovative solutions from simple and original ideas conceived for spaces with an exclusive design. Each project is preceded by a careful study of ergonomics, reflecting not only the production needs of companies but also highlighting the attention to detail and style of each project. This process begins with a formal sketch and a 3D design, culminating in the creation of a prototype. He began designing accessories and furnishing accessories for furniture and contract furnishings, collaborating with numerous leading companies in Lombardy, Veneto, and Friuli, many of which are involved in the world of upholstery, furniture, and chairs. A blend of creativity and rationality has always characterized his way of thinking and acting. In his design career, he has received important recognition and special awards by participating in numerous national and international competitions. Creativity and originality are the cornerstones of his work, which has always distinguished him with great enthusiasm and professionalism. For him, the concept and philosophy of the word design are synonymous with imagination, emotion, and creativity.
